- Reports to:** Manager, Source Water and Stewardship
- Details:** 35-hour work week - \$17.60/hour + 4% vacation pay
- This is an in-person position. No hybrid work arrangements
Approximately from late April/early May to August 2026 – 16 week
- Artificial Intelligence will not be used in the recruitment process
-

Position Overview

The primary purpose of the Environmental Technician is to provide support in the delivery of the Authority's monitoring program, environmental education and outreach program, stewardship program, and the Drinking Water Source Protection Program.

This opportunity is a good fit for an individual still completing their post secondary education.

Primary Responsibilities (This is not an exhaustive list)

1. Assist Watershed Management staff with the collection, entry and analysis of data required for Authority monitoring programs
2. Assist Watershed Management staff with the development and delivery of environmental education programs and activities
3. Assist in the development and implementation of stewardship projects including tree planting and habitat enhancement throughout the watershed
4. Other activities may include attendance at special events and assisting staff in other departments

Skill

- **Education:** Be enrolled in a relevant post secondary educational program related to geography, biology, natural resources management or related discipline
- **Knowledge:** Knowledge of conservation authority programs and services including watershed management would be an asset

- **Professionalism:** Excellent time management and organizational skills and ability to complete projects on time
- **Communication:** Excellent oral and written communications skills
- **Experience:** Demonstrated ability to collect, analyze and interpret environmental data
- **Technology:** Strong computer literacy skills in Microsoft 365
- **Other:** Valid Ontario driver's license, experience collecting data in the field and species identification. Ontario Benthos Biomonitoring Network Certification (OBBN) is an asset

Effort

- Fatigue resulting from focusing and juggling multiple priorities, high degree of concentrated attention, focused thinking and analysis
- Occasionally, traverse irregular or uneven surfaces and terrain while carrying equipment for collection of samples and monitoring activities

Working Conditions

- Working time is spent in a combination of office and field environments
- Working time will involve independent activity and working as part of a team
- Occasionally traverse irregular terrain and/or work in wet insect infested areas
- Occasional exposure to inclement weather
- Occasional travel outside working hours
- Occasionally extend or modify hours of work to attend meetings, seminars, workshops or complete fieldwork
 - Working time is spent primarily at the administrative office with the occasional travel for training or field work required.
 - Occasional exposure to outdoor elements, environmental hazards (e.g., wildlife, poison ivy), and physical labor.
 - Occasionally extend or modify hours of work to attend meetings, seminars, workshops.
 - Occasional interaction with the public, including managing public inquiries, complaints, and ensuring a positive experience.
