

NOTICE OF PROJECT APPROVAL Millbrook Dam

The Otonabee Region Conservation Authority has now completed the planning and design process approved under the Environmental Assessment Act in the *Class Environmental Assessment for Remedial Flood and Erosion Control Projects* for undertaking a remedial project regarding the Millbrook Dam located in Millbrook Ward in the Township of Cavan Monaghan, Peterborough County.

We thank you for your interest, and participation in the planning of this project.

The preferred option for the Millbrook Dam is the reconstruction of the spillway and enhancement of the earthen embankment to ensure the integrity of the dam during periods of high flood periods. Public access across the dam via a foot bridge and other amenities are also incorporated in this option and reflect the community values for the site as expressed throughout the consultation process.

The Otonabee Region Conservation Authority will now proceed to undertaking the preferred option with an estimated date of project implementation in 2018-2019.
