CONSERVATION

Trail Photo-Op

WHO WAS HERE?

Wildlife is abundant on the trails and surrounding areas, even if you don't see it.

The mammals, birds, reptiles and amphibians that live here are experts at not being seen but if you look closely you'll find evidence of them.

Become an animal detective and look for the clues they leave behind like tracks, feathers, and nests.

We want to see your photos!

If you take photos while visiting one of our conservation areas, share them to social media and tag us!
